

STEP03

1. Position 속성

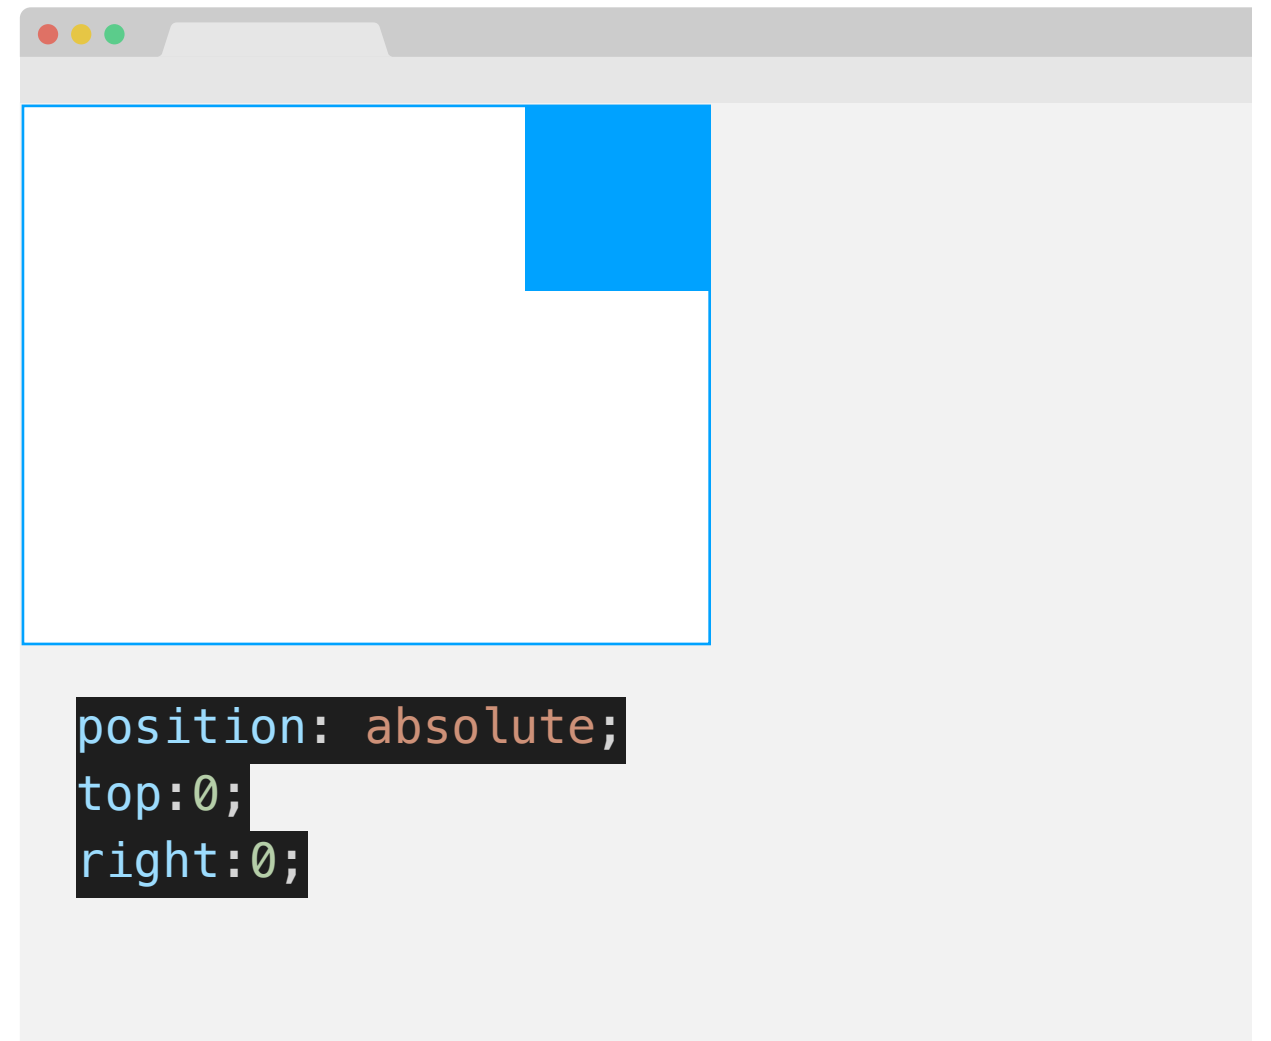

2. Float 속성

```
<div class="position-wrap">  
  <div class="position-content"></div>  
</div>
```

.position-wrap(부모)에 **position** 속성이 없는 경우

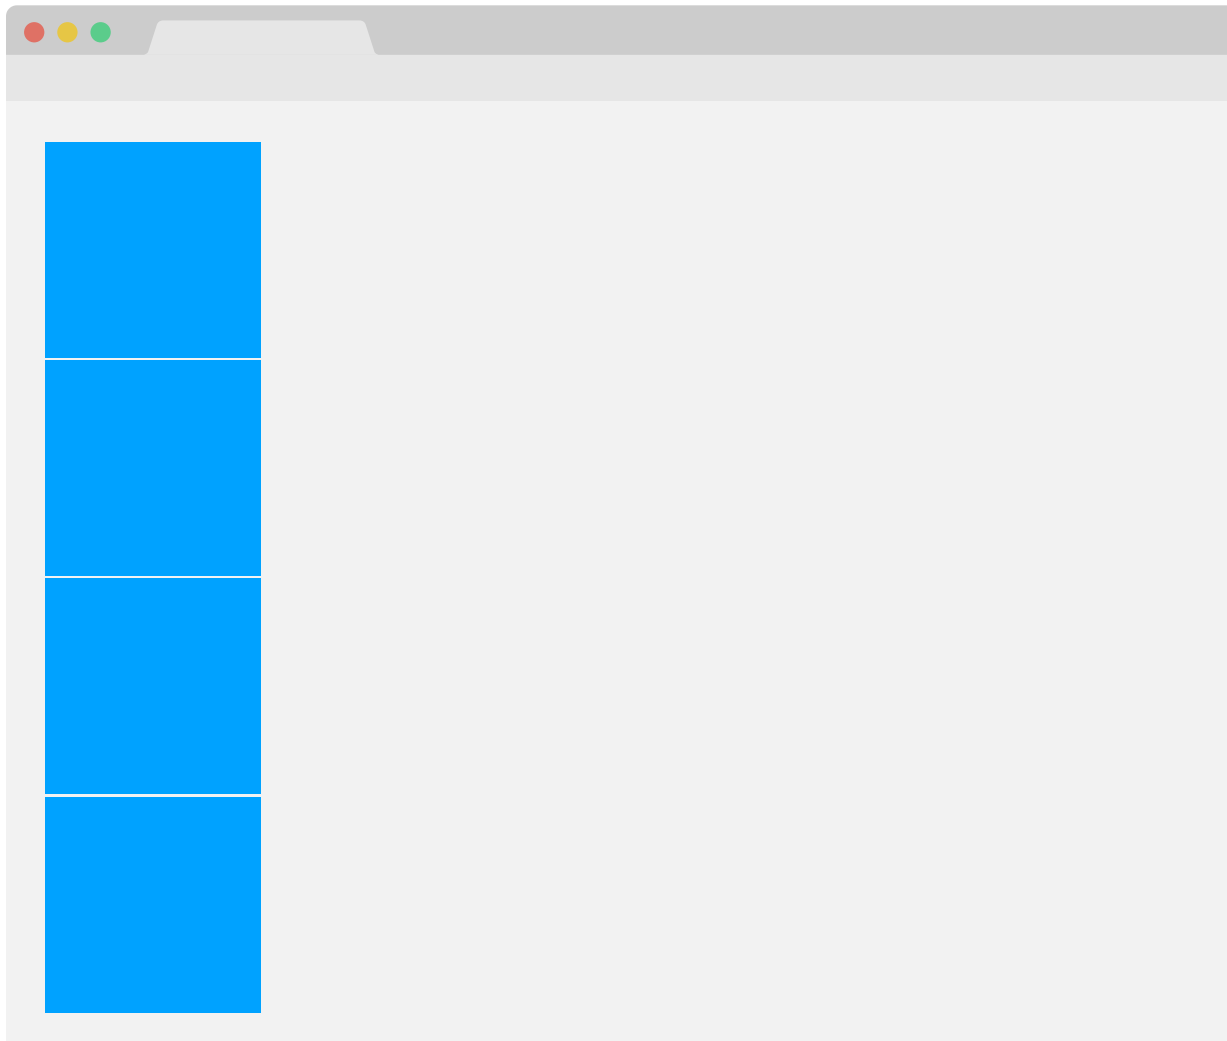

.position-wrap(부모)에 **position** 속성이 있는 경우

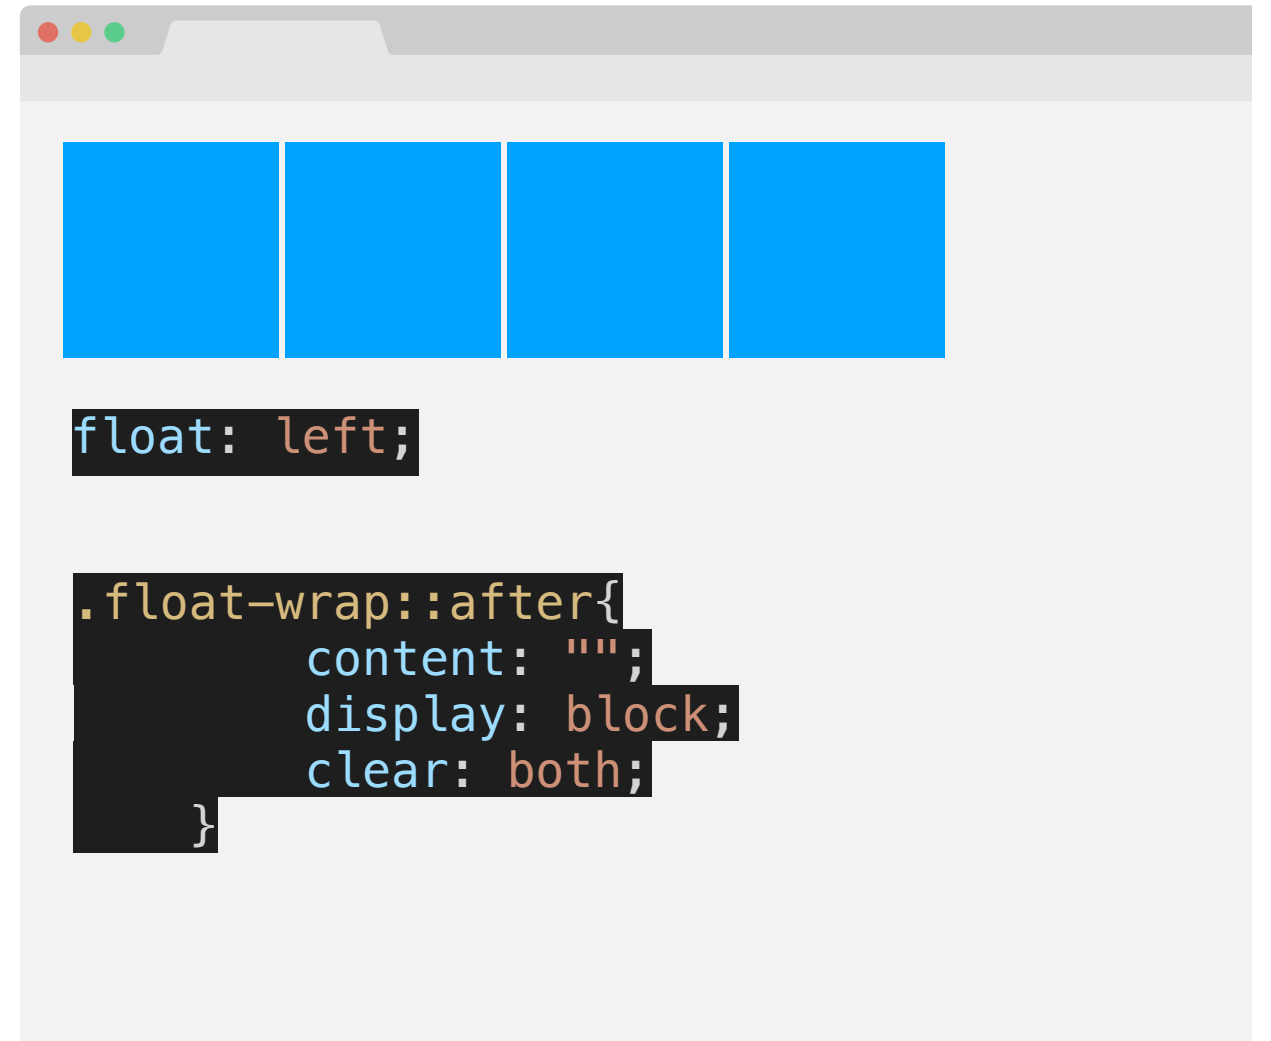

```
float: left;  
float: right;
```

다음에 오는 태그를 왼쪽(오른쪽)에 붙게 할꺼야!

```
<div class="float-wrap">
  <div class="float-content"></div>
  <div class="float-content"></div>
  <div class="float-content"></div>
  <div class="float-content"></div>
</div>
```

float 속성이 없는 경우

float 속성이 '**left**' 경우

.float-wrap(부모)가 영역을 인식하려면 뒤에서 **clear:both**
